Materials Handling Products & Solutions

Products and Solutions

Providing tough, durable, colourful
storage solutions that work.

Contents

Multi-Use Plastics

All plastics used in the moulding process on site are
recyclable. When they finally reach the end of their life,
we work closely with customers and our processing
partners to have the plastics recycled into new items
rather than being sent to landfill.

Production Site and UK Manufacturing

Virtually all products are made on site in our centrally located UK factory, ensuring we retain control of the entire manufacturing process.

Design-Led Solutions

Our products include multifunctional boxes and trays to streamline processes in the food industry, specialist cabinets to help hospitals store vital equipment safely and efficiently, and IBCs for a wide variety of bulk storage needs.

Our ranges are constantly evolving in response to technological advances, changing customer needs and global markets. If required, we can even work with customers to develop bespoke solutions.

Concept through to Production

We work closely with customers, from discussing and developing initial concepts, technical designing and prototyping, through to commissioning tooling and manufacturing the final product.

Quality Control

We represent the absolute best of the UK manufacturing industry, producing highly effective storage products conceived and constructed by skilled and committed staff working out of our impressive head office.

Product Personalisation

We offer a wide range of product personalisation options for a truly bespoke experience – your graphics, your text, our products.

Accreditations and Associations

We are recognised by the UK's leading associations and accrediting agencies.

recycle

Reuse, Return, Recycle

We are committed to making all our processes as environmentally friendly as possible, reducing waste and recycling.

We sincerely care about how what we do impacts on our planet and are proud to be fully accredited to the ISO 1400:2015 environmental manufacturing system.

Working With People

Over the phone or in person, Mailbox Products is always there to support your business.

Improving Efficiency

We work closely with customers to develop systems that improve efficiency and streamline procedures.

This may be through refinements to an existing system or development of an entirely new one. A streamlined process means fewer errors and delays.

Mailbox

Trade Shows and Exhibitions

We are always keen to share our innovative materials handling solutions with a wide national and international market.

We regularly participate in trade shows and exhibitions, attracting many visitors to our colourful stands.

Food-Approved Materials

In the food industry, sorting and segregation of product is extremely important, but there are no national guidelines when it comes to colour choices – a colour that denotes fish in one company could mean dairy in another.

With our containers, you can develop your own colour-coding system or complement an existing one. With virtually all our products available from stock, this can be done quickly and efficiently to meet the needs of a fast-moving market.

Euro Stacking Dolly
Robust and easy to clean

Mailbox Products plastic wheeled dollies are a secure and effective way to move items with ease in warehouses, shops and offices. Because minimal effort is required, they are much safer for users than lifting. They also save the time wasted on repeat journeys as many plastic containers, boxes and trays can be stacked or nested on the dolly, meaning fewer trips to and from locations.

- **Heavy-duty**
- **Euro dollies**
- **Easy to manoeuvre**
- **Durable**

- **Food-approved plastic**
- **Hygienic and compact**
- **Personalisation options available**

Stacking Boxes 765 x 455mm

Mailbox Products 765 x 455mm stacking boxes have a multitude of applications and are an ideal alternative to corrugated packaging for moving and storing goods. Durable and easy-to-clean, they are suitable for use across many sectors from education to car manufacture and stack for easy, space-saving storage. Perforated options and food grade virgin polypropylene construction makes them ideal for the food industry or for any products that need ventilated storage, and they are often found in bakery and confectionery environments.

- **Variety of capacities and colours**
- **Available in food grade virgin polypropylene or high density polyethylene**
- **Robust and durable**
- **Stack for easy storage**
- **Up to 8 colour options on trays, 10 colour options on dollies**
- **Personalisation options available**

Bakery Racks

M111 container frames - See page 25-26 for containers

Bakery racks are an essential part of any commercial bakery. They are used to store confectionary trays and bakery trays safely off the floor. The open design allows products to cool without going soggy. They are also suitable for other food contact environments.

- Mild or stainless steel options
- Fully welded construction
- Easy-to-manoeuvre bakery trolleys
- Easy-clean catering storage

Stacking Boxes
640 x 385mm

Mailbox Products 640 x 385mm stacking boxes are especially suitable for applications where hygiene & strength is important. Designed with large radius corners making them easy to clean, they are also manufactured to withstand demanding environments.

Perforated options and food grade virgin material construction makes them ideal for the food industry or for any products that need ventilated storage. They are widely used in food production areas, especially meat processing and fish processing.

- Available in a variety of capacities and colours

Retail and Distribution Bale Arm Crates
400 x 300 and 600 x 400

With up to 75% nesting capabilities, Ultranest gives you the ultimate RTP logistics stack nest crate system. These containers have swing bars that allow positive stacking when in use and then fold away to allow the containers to nest when empty, optimising valuable distribution and storage space.

They are manufactured in high grade virgin materials, making them suitable for food contact and also temperature controlled environments. The perforated design of each container has specifically been chosen to improve airflow while maintaining the tare weights that the market demands.

- Euro size stack / nest containers
- Optimum nesting
- Easy to clean
- Made of food-grade material

Stack / Nest Boxes
RTP containers

Mailbox Products stack / nest containers are designed to stack when they are in use and nest inside each other when they are empty. This space-saving feature means this range is ideal for use as Return Trip Packaging as when nested on the return trip they can nest up to 50% of their total volume.

- **Ideal for use on conveyor systems**
- **Stack / Nest containers with rods**
- **Stack / Nest using lids**
- **Strong bale arms**
- **Personalisation options available**

Attached Lid Boxes
600 x 400mm

Mailbox Products attached lid containers (ALCs) are moulded in food grade virgin polypropylene and are available in a wide range of colours and sizes. They offer all the benefits of our stack/nest containers but with a useful lid. This is ideal for contents that require added protection for their outward journey.

The containers stack safely when full and can be nested after delivery by locating lids in their open position. This saves on valuable distribution and storage space.

- Made of food-grade virgin material
- Integral hinged lid
- Easy to clean
- Robust and durable
- Space-saving
- Stack/nest for easy storage

Pallet Tanks

Designed to meet the highest hygiene standards, including smooth interior and rounded corners.

Pallet tanks are reusable, multi-use, industrial-grade containers engineered for the mass handling, transport and storage of liquids, semi-solids, pastes or solids. They offer strength and durability and are seen across a variety of industries including logistics, waste and recycling, food and agriculture.

Drop-on Lid	K8975

- **Outstanding folding ratio**
- **Double wall construction**
- **Ideal across all industries**
- **Works seamlessly with automated systems**
- **Reinforced base**
- **Protects fragile contents**
- **Strong and long-lasting**
- **Easy to clean**
- **Compatible with most existing containers**

Label holders
Identify contents easily, with convenient label holders on two sides.

Non-sequential folding
Flexible hinges allow non-sequential folders to save time and energy.

Unique interlocking design
Interlocking sides ensure easy, fast and secure erection.

Safety
Chamfer design prevents operator injury.

MATERIAL:	Food Grade Polypropylene
STACK/NEST TYPE:	Folding
FOLDING RATE:	3:1
DYNAMIC LOAD	1300 Kg
STATIC LOAD	3300 Kg
UNIT LOAD	+500 Kg
TARE WEIGHT	58 Kg

Mailbox has one of the widest ranges of materials handling solutions in Europe. The K975 is an exciting addition to our portfolio.

Sleek, modern appearance, strong construction, maximum space efficiency and clever design bring a raft of benefits to any logistics systems.

1 Drop door:
For quick and easy loading and unloading.

2 Hidden hinges:
Smooth, hygiene internal design ensures maximum space efficiency.

3 Secure fitting lid:
Ensure contents is protected from damage, dirt, water etc.

4 Stacking compatibility:
Curved skid guarantees compatibility with most other containers. Reinforced rib design on base increases load capacity.

5 Drainage system:
Base drainage systems maximizes water evacuation following rain or cleaning,

Bottle Trucks

High-quality construction and a generous capacity

Mailbox Products industrial bottle trucks are ideal for collecting, transporting and storing empty bottles or other products in environments such as restaurants, bars, pubs, hotels and function venues. Smooth construction ensures easy cleaning, which is essential for food-related use.

- **Large capacity**
- **Easy to clean**
- **Robust and durable**
- **Support hygienic recycling**
- **Easy to manoeuvre**
- **Personalisation options available**

Mailbox Products ingredients trolleys are popular in commercial and plant bakeries, food manufacturing and processing, hotel and restaurant kitchens and the general hospitality trade. They are ideal for storing, transporting and dispensing dry food ingredients such as flour, cereal, rice, sugar and grain and come in a variety of colours to assist with colour-coding and product separation requirements

- **Food approved**
- **Easy-to-clean mobile storage**
- **Versatile**

- **Large, food-approved containers**
- **Hygienic large ingredients bin**
- **Personalisation options available**

www.mailboxproducts.co.uk

Mobile Ingredients Bins

65 - 142 litre bins

Ingredients bins are designed to allow easy filling and dispensing but also have lids to protect contents and prevent spills, smells and cross-contamination. They are compact and mobile, so can be stored easily under tables to maximise space utilisation.

- **Made from food-grade materials**
- **Easy to clean**
- **Robust and durable**

Wire Racking Flat-pack design

Mailbox Products wire racking is an effective shelving system for any commercial or industrial environment. It is elegant, minimalist and timeless. The open wire racking reduces dust accumulation and allows a free circulation of air, greater visibility of stored items and more light penetration.

- Quick assembly
- High gloss finish
- Fully adjustable
- Free circulation of air
- Easy to clean
- Mobile or static use

Stainless Steel Wire Racking Flat-pack design

Mailbox Products stainless steel shelving is minimalist and stylish, combining elegance with the strength and flexibility necessary to provide a huge amount of storage with ease. The open design ensures free circulation of air and makes it easy to identify shelf contents. Ideal for healthcare, food service and pharmaceutical applications stainless steel racking can be used with confidence in the most demanding of environments.

- **304 grade stainless steel**
- **Easy to assemble**
- **Visible storage of items**
- **Corrosion-proof**

4 TIER UNIT

Flat pack design installation

Designed for aggressive applications and cleaning processes

Excellent air circulation

ACCESSORIES

- **Mobile options available - add "M" to end of part number**
- **Additional shelves are available as an optional extra**

150 kgs load bearing per shelf

Swift Racking
Flat pack design

Swift Rack is an ingenious racking system which is easy to assemble. It simply slots together without the use of any nuts and bolts.

Swift Rack is injection moulded in polypropylene around a steel core. It is hygienic, stable, versatile and strong. Load bearing capacity of 150Kgs per shelf, maximum load of 600Kgs per section.

ACCESSORIES:
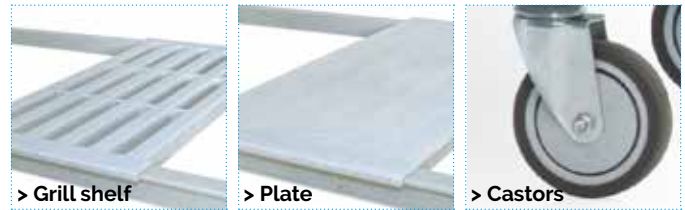

> Grill shelf

> Plate

> Castors

IDEAL FOR:

- **Hotels and food processing preparation areas**
- **Laboratories - resistant to most chemicals**
- **Wet areas - Swift Rack is rust-proof**
- **Cold rooms and freezers to -30°C**

150 kgs per shelf

Right angle bays support bracket

Straight bay clip

Easy to clean and dishwasher safe

Adjustable gauges of 100mm

No tools Required

Freestanding or on castors

Foot stability

Shelving bay

Hygienic, stable, versatile and strong

AVAILABLE IN:

- **2 standard heights, 1500 and 1800mm, with 4 shelves per bay adjustable at gauges of 100mm**
- **4 standard lengths, 675, 975, 1375 and 1775mm**
- **2 standard shelf depths, 400 and 600mm**

Storage lockers High-quality lockers

- **Fire tested**
- **UK-designed and manufactured**
- **Anti-bacterial powder-coated**
- **Colour door options**

These lockers have also been Fire Tested in accordance with the European Standard EN-13501-01:2007 +A1 2009 for fire performance. This means that they have been tested as non-combustible and will not combust, sustain or increase a fire that is within their proximity. A great choice for use in cloakrooms, corridors and circulation areas within both education and workplaces.
