

SIMPLER RECYCLING REFORMS ARE COMING

Are you ready to recycle?

Are you prepared for the Simpler Recycling law?

Simpler Recycling is a reform to the recycling system. It means that people across England will be able to recycle the same materials, whether at home, work or school, ending confusion over what can and cannot be recycled in different parts of the country.

On 31st March 2025, it will become law for all businesses, charities and public sector organisations (including healthcare establishments and academic institutions) to sort their waste for recycling.

This change also applies to all waste and recycling collectors and processors who manage household-like waste from workplaces.

How can recycling benefit a business?

- **Conserve natural resources**
- **Reduce greenhouse gas emissions**
- **Demonstrate social responsibility**
- **Reduce environmental impact**
- **Contribute to innovation and growth**
- **Impact positively on production processes and resources**

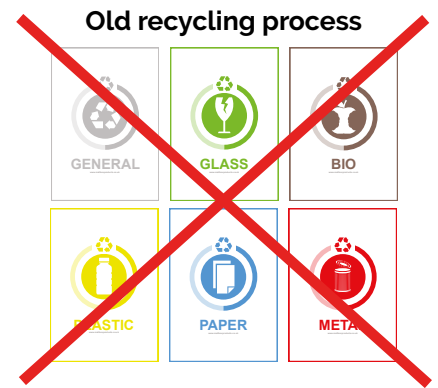

By implementing the correct recycling and waste management schemes, your business saves money and helps the environment.

The new rules

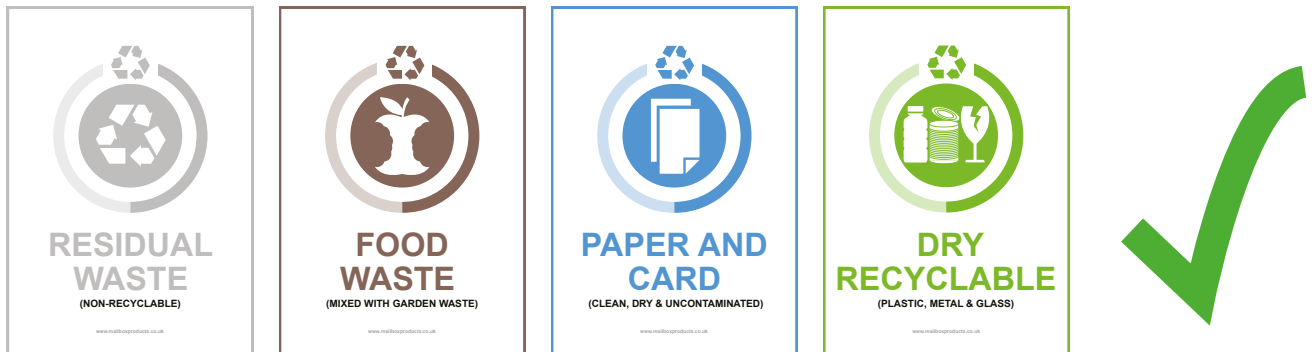

From 31st March 2025, to comply with the new Simpler Recycling law, different materials need to be sorted and separated on your site before they are collected to be processed.

This means waste is protected from contamination as early as possible, so more of it can be recycled - a really positive benefit and great news for the planet!

What is the Simpler Recycling law?

The Simpler Recycling law states that all businesses and other non-household premises with ten or more full-time employees must separate dry recyclable materials (plastic, metal, glass, paper and card) and food waste from residual waste. Paper and card must be collected separately from plastic, metal and glass.

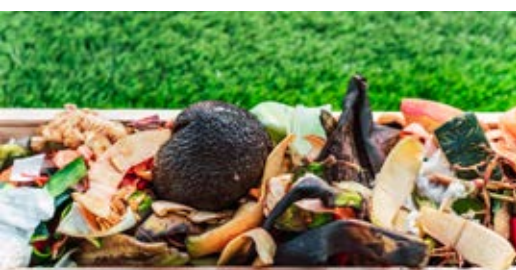

New default requirements

The new default requirement for most households and workplaces will be four containers for:

- ✓ **Residual (non-recyclable) waste**
- ✓ **Food waste (mixed with garden waste if appropriate)**
- ✓ **Paper and card**
- ✓ **All other dry recyclable materials (plastic, metal and glass)**

These may be various container types, including bags, bins or stackable boxes.

Everything you need

There is some flexibility within the legislation to make sure it can be applied easily and effectively within your business's specific needs. To accommodate this, we offer bespoke signage and colour options.

In the first instance, we recommend talking to your waste collection provider, who can advise you on the service they will be offering. We will then work with you to ensure you have the right stencils or stickers for your recycling bins and containers.

What do I need to do?

To make sure you comply with Simpler Recycling requirements, you need to have a robust recycling policy in place and the bins and other equipment necessary to make it work. If you don't, you could face fines and other sanctions.

The countdown is on – to be ready for the changes on 31st March 2025, you should start preparing as soon as possible.

Mailbox has the knowhow and products to be your ideal recycling partner, ensuring that you are recycle-ready by the important government deadline.

Be recycle-ready with Mailbox

At Mailbox, we have a huge range of products that will help you to comply with the new rules. Our bins make it easy to recycle, whether you want to use colour coding, clear signage and graphics, or both! We also offer fun character bins and a full range of bespoke options.

We have been providing materials management solutions to businesses like yours for over 50 years, so we have the expertise to make sure you have the products you need. Our products are also designed to look good and enhance the workplace.

Capacity levels

Mailbox bins come in a wide variety of shapes, sizes and capacities, all developed to streamline the collection and segregation of waste prior to recycling.

Our compact tabletop and under-table bins are ideal for the office environment, with one or more fitting easy into the workstation. Waste paper and other small items can be put straight from the desk into the bin, without risking cross-contamination.

At the other end of the scale, our large wheelie bins are perfect for any type of heavy duty industrial and commercial waste. Strong wheels mean they can be moved easily, taking segregated waste directly to the collection point quickly and efficiently. We also have specially designed can and bottle recycling bins with various lid options and sturdy bar bottle trolleys for mobile collection.

You can choose from range of bright colours for the establishment of a colour-coding waste segregation plan or simply to match your company branding. Whether you have a lot of waste or a little, we'll work with you to deliver the right solution.

The Mailbox promise

We understand that it can be hard for businesses to respond to changes like this when they are already working round the clock to succeed in an often challenging commercial environment.

We promise to provide outstanding products, made by our own experienced manufacturing team to the highest standards to provide many years of service. In this way, we help you to make recycling an integral part of your operations.

Ask us over!

No two businesses are the same. Our field specialists can visit your facility, discuss recycling management requirements, and provide free, no obligation, customised advice.

As a company, we have more than 50 years' experience in materials handling – we are here to share that experience with you.

31st March is approaching. Contact us now to start your Simpler Recycling compliance journey

Mailbox products are designed and produced at our own centrally-located UK factory. This means you benefit from readily available stock levels, with orders delivered to you quickly and efficiently.

A wide range of colourful, robust, beautifully designed products

Mailbox offers full on-site support

Euro Stacking Boxes

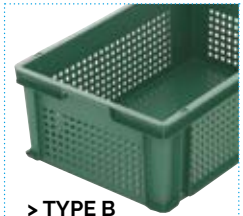

400 x 300mm

Mailbox 400 x 300mm Euro size plastic stacking containers are space-saving by design and are manufactured to fit Euro and Industrial pallet sizes. They are available in solid and perforated options for products that require ventilation. They have a strong profile handle for easy lifting and come in a wide variety of colours to integrate with any colour-coding or branding strategy.

- Made from food-grade materials
- Easy to clean
- Robust and durable
- Positive stacking for safety
- Up to 10 colour options

Euro Stacking Dolly

Robust and easy to clean

Mailbox plastic wheeled dollies are a secure and effective way to move items with ease in warehouses, shops and offices. Because minimal effort is required, they are much safer for users than lifting. They also save the time wasted on repeat journeys as many plastic containers, boxes and trays can be stacked or nested on the dolly, meaning fewer trips to and from locations.

- Heavy duty
- Easy to manoeuvre
- Durable
- Food approved
- Hygienic and compact
- Personalisation options available

CHOICE OF RECYCLING STENCILS AND STICKERS

We offer bespoke signage and colour options to ensure you have the right stencils or stickers for your recycling.

Internal Heavy Duty Segregation Bins

Domed and push-top lids

Bright and stylish segregation bins are an excellent way to encourage litter collection and recycling. The slimline design makes these suitable for many environments. The domed hood is available in different colours and there is an optional galvanised steel liner for added versatility.

- High quality
- Strong and durable
- UK manufactured
- Easy to clean
- Deep rim lid holds and conceals liner bags
- Personalisation options available

Battery Bin and Liner

Recycling bin with liner

Mailbox themed battery recycling bins have a generous 50 litre capacity. They are supplied with a plastic liner to reduce capacity to 25 litres. Colourful graphics and stylish design combine in these useful and eye-catching bins that encourage recycling wherever they are located. They can be easily wiped clean if needed.

Focusing on recyclable items

Moulded Trucks

115 - 450 litres

For moving large amounts of product from A to B, Mailbox moulded trucks are invaluable. Strong casters ensure stability. The trucks offer generous capacities and have optional lids for extra protection of contents.

Some models are available with a handle for even greater manoeuvrability. The wide range of bright colour options makes them suitable for use with colour-coded segregation systems.

Efficient waste disposal & recycling

Two solid rubber wheels

4-Wheeled Bins 660 - 1000 litres

Wheeled bins include a lifting trunnion. This means they can be used in conjunction with REL trucks and compactors with fixed arms as part of a larger materials handling programme or logistics solution. Whatever waste you want to put in them and wherever they are kept, Mailbox Wheeled bins are more than up to the job.

- Simple hinge mechanism
- 4 swivel castors
- Rear and side vehicle loading
- Ideal for colour coding
